TI Pro v5.6.108 Release Notes

What we've been up to on the journey of providing the best market tools in the world.

Changes in Version 5.6.108, since the release 5.6.106:
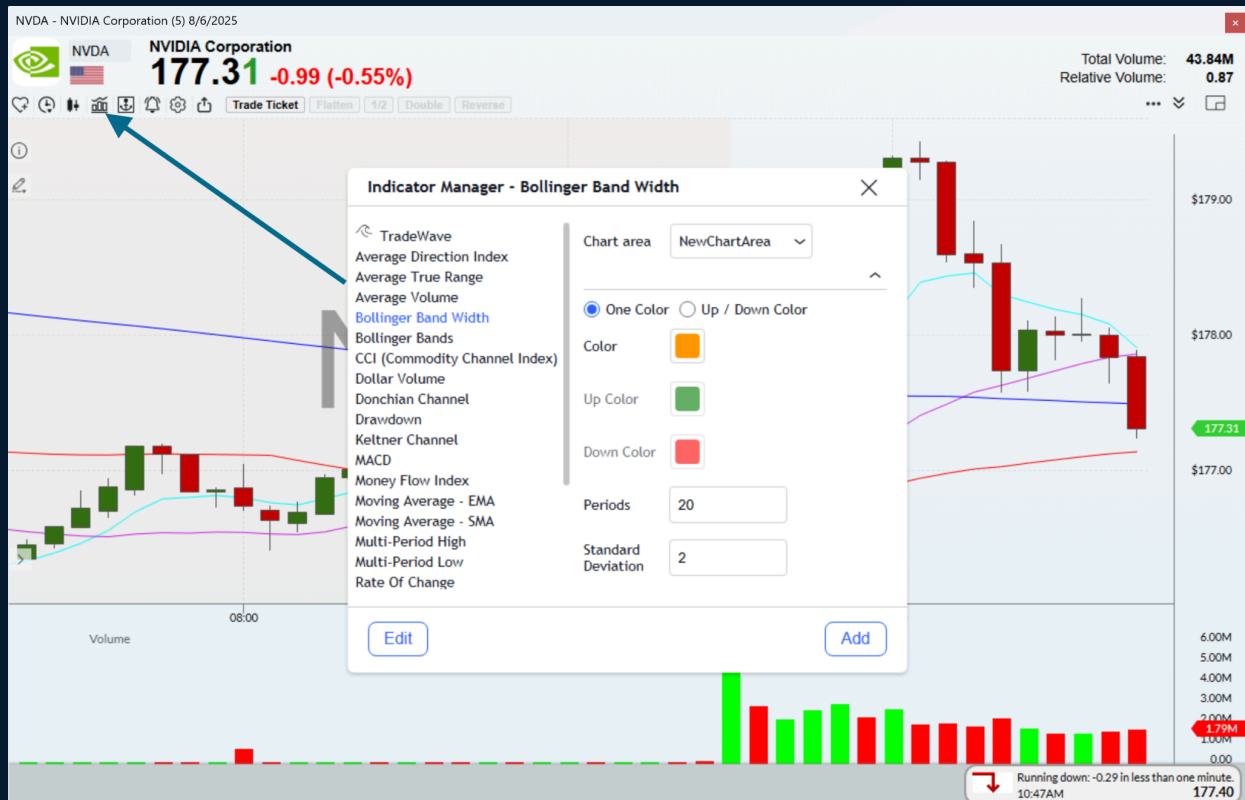

🔥 New Features 🔥

Alert Stream on Charts
- *You can now see relevant alerts for active symbols without even leaving your chart!*
- *This feature is enabled by default, but you do have the ability to enable and disable it.*
  - *Click the ellipsis in the top right corner*
  - *Toggle "Display Alerts on Chart"*

💪 Improvements 💪

Updated Indicator Manager
- *The chart indicator manager has received a facelift to make it easier to use, and on the eyes!*

Long Term Strategy Trades Charting

- *Our Long Term Strategy Trades window now incorporates our newer charting for a sharper and more enhanced look.*
  - *Go to New > Premium AI Long Term Strategy Trades to track historical AI positions as profitable swing trades!*

🐛 Bug Fixes 🐛

- *Addressed a bug that would cause accounts to be re-selected in the Brokerage Plus positions tab when they were saved as part of a layout.*
- *Additional handling for users with specific graphics card compatibility issues*
- *Addressed a bug that caused a conflict between existing position selection and the default Brokerage Plus order size in the Order Entry Panel*

- *Addressed a bug that prevented Etrade users from seeing the correct P&L values when closing and relaunching TI Pro*
