

TI Pro v5.9.2 Beta Release Notes

What we've been up to on the journey of providing the best market tools in the world.

Beta release • Changes since v5.9.1

Release Highlights

★ AI Assistant onboarding makes it easier to get started with the assistant inside TI Pro.

Improvements

AI Assistant Onboarding

Getting started with the AI Assistant inside TI Pro is now easier.

- The AI Assistant options have been updated.
- The AI Assistant now takes focus properly when TI Pro starts.
- AI Assistant icons have been updated and repositioned.
- Setup now handles layouts that have no default layout.

Bug Fixes

- Resolved an error that could appear when parts of the screen were updated while TI Pro was working in the background.
- Corrected how partially filled Alpaca orders are handled.
- Resolved an error that could occur when saving a formula in the formula editor.
- Resolved cases where charts could show a red X and TI Pro could display error messages.
- Fixed fractional share positions that could not be closed in the paper trading account.
